Credential And Manage Compliance For Your Entire Vendor Population

symplr Spend

Make Accelerated, Value-Based New Product Decisions

The Opportunity

Build an efficient, data-driven, collaborative, transparent, and clinically supported supply chain

Healthcare executives are feeling pressure to reduce spending. And as supply chain management becomes critical to protecting revenue and driving value, organizations seek to work collaboratively with stakeholders from across the enterprise and use standardized workflows and unbiased data.

But driving vendor compliance and aligning new product decisions across stakeholders requires connecting the dots and closing gaps that allow financial leakage. Hospitals can make defensible, value-driven product decisions and enforce strategic vendor access policies that mitigate risk only if their single system:

- Replaces disconnected point solutions used for physician and vendor engagement, critical savings opportunities, compliant vendor interactions, and value-based product decisions
- Automate and manage every process and task— from vendor credentialing to product compliance and value analysis

With an integrated solution partner, you can:

- **Mitigate vendor compliance risk and prevent costly fines**
- **Monitor critical vendor interaction data, virtual and in person**
- **Establish a vendor compliance checkpoint during product evaluations**
- **Increase cost avoidance amid dramatically rising supply chain costs**
- **Support patient outcomes with evidence-based product decisions**

Access

Vendor credentialing built to protect healthcare compliance

Relationships drive healthcare: when the right people connect at the right moment, it can save time, improve outcomes, and ultimately impact lives. symplr makes vendor management as simple as possible by delivering software that best fits your needs, using advanced credentialing and verification technology designed to promote a culture of compliance and streamlined processes.

Key Capabilities

- Internet-free credentialing and check-in technology means fast access for compliant vendors
- Admins and vendors access an easy-to-use mobile app
- On-demand dashboards quickly supply critical data for compliance monitoring
- Background checks, OIG compliance healthcare exclusion screening, and custom immunization credentialing tools are built in
- Our fully customizable credentialing requirements fit your unique credentials and vendor access levels
- Comprehensive reporting keeps data at your fingertips for audits and strategic, system-level reporting

Key Benefits

- Check-in vendors efficiently, both in person and virtually, and effectively manage vendor relationships
- Meet regulatory reporting requirements with a strong audit trail for vendor interactions
- Keep your staff and patients safe, ensuring only compliant vendors enter your facilities

Spend

Value analysis and decision support software

A new product is an instrument that affects costs, quality, patient outcomes and lives. That's why we're on a mission to help health systems efficiently make defensible decisions that connect providers with life-saving technology. symplr Spend equips health systems with the automation, collaborative workflows, and product data needed to rigorously evaluate medical technology and connect stakeholders across the supply chain.

Key Capabilities

- New product requests come through one centralized digital entry point
- Automated value analysis workflows, custom review teams, and communication tools aid better decision making
- Centralized product data includes pricing, contract identification, FDA recall and MAUDE events, product equivalents, and product comparison information
- Detects duplicate product requests and price variances across the system
- Users access objective clinical evidence research with digestible summaries and clinical ratings
- A robust product library has more than 300,000 unique SKUs to provide product education and access to aggregated product data
- Verified supplier data with direct messaging ability enables users to connect with reps on their own terms

Key Benefits

- Ensure the products you introduce are value based and rigorously evaluated
- Digitally transform your organization by replacing manual tasks with digital workflows
- Drive value by gaining transparency across the system, standardizing products, and achieving meaningful cost savings
- Achieve better oversight of all vendor relationships
- Engage physicians in the value analysis process, driving a clinically integrated supply chain

symplr SUPPLY CHAIN SUITE

We fervently believe that better operations can transform healthcare.

We offer software and services that improve your operations.
