

A Journey to Excellence with symplr Solutions

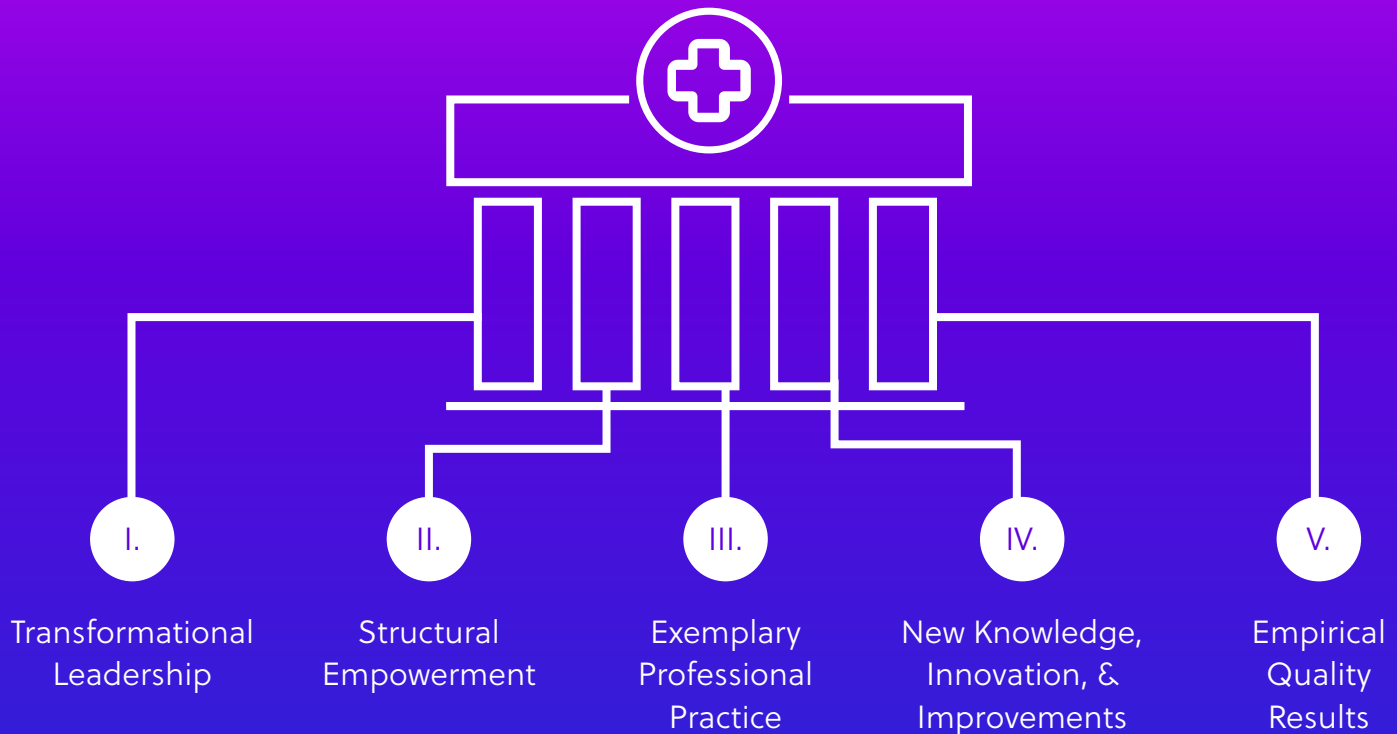

ANCC Magnet Recognition

ANCC Magnet® Recognition is the highest and most prestigious international distinction a healthcare organization can receive for nursing excellence and quality patient care. The ANCC Magnet Recognition Program Model serves as the roadmap for organizations seeking Magnet Recognition and provides a framework for nursing practice and research in the future.

For some organizations, it can take years to collect Magnet application information because the data resides in disparate systems and is measured differently. By partnering with symplr, your organization will leverage data, technology and expertise needed to achieve and maintain this valued distinction.

symplr has been dedicated solely to healthcare, providing technology and expertise to support the discipline of nursing and their healthcare organizations for over 30 years. Our integrated solutions create efficiencies and provide access to data for actionable insights to improve outcomes, helping support organizations on their Magnet Journey.

Five Components make up the ANCC Magnet Recognition Model

I. Transformational Leadership

The healthcare environment today is rapidly changing, and nursing leadership will be required to create a vision and plan for the future, transforming their organization's values, beliefs, and behaviors. New approaches to recruiting, reviewing, retaining, and scheduling clinical teams will be essential to supporting the future workforce. In addition, nursing leaders will be more involved with adopting emerging technologies, requiring quality evidence to guide decision-making and organizational planning.

II. Structural Empowerment

Solid structures and processes are the foundation to ensure the mission, vision, and values are aligned to achieve organizational outcomes. Staff need to be developed, directed, and empowered to find the best way to accomplish organizational goals. Access to real-time quality data, ongoing staff development and education, and streamlined clinical communication are ways to help strengthen professional practice and support this Component.

III. Exemplary Professional Practice

Exemplary professional practice entails the comprehensive understanding of the role of nursing and the application of that role with patients, families, communities, and interdisciplinary teams. Moreover, it is about what exemplary professional practice within nursing can achieve. Access to evidence and benchmarking data will help to support exemplary practice and decision-making.

In addition, healthcare-specific workforce management solutions that reduce administrative burden and create collaboration and streamlined communication will positively impact care delivery.

IV. New Knowledge, Innovation, & Improvements

Magnet-recognized organizations have an ethical and professional responsibility to contribute to patient care, the organization, and the profession. Current systems and practices need to be redesigned to be successful in the future. This Component includes new models of care, application of existing evidence, new evidence, and visible contributions to the science of nursing. Evidence and safety data analysis are required when adopting new technology, along with the ability to demonstrate provider improvement to payers.

V. Empirical Quality Results

This Component looks at clinical outcomes related to nursing; workforce outcomes, patient and consumer outcomes, and organizational outcomes. Using an evidence-based approach to guide decision-making can improve results in quality and clinical outcomes. In addition, workforce management and clinical communication technology can provide the foundation for structure and uniform process across the enterprise resulting in improved staff engagement and patient satisfaction outcomes.
