

Smarter way to evaluate new medical technology

An innovative platform streamlining the selection and introduction of new medical technology

symplr Spend equips strategic health systems with the tools, workflows, and insights needed to quickly and confidently make evidence-based decisions on medical devices. symplr connects all stakeholders within this complex ecosystem while providing access to data surrounding pricing, contracting, clinical evidence, product equivalents, comparisons, and safety data for a strengthened value analysis infrastructure.

New Product Management

symplr's New Product Management tool incorporates all functionality of the product request and evaluation process, including:

- Product request centralization
- Workflow & communication
- Teams, committees, & agendas
- Product evaluation
- Financial comparison
- Item number automation
- Integration with vendor credentialing via symplr Access

Product Intelligence

symplr's Product Intelligence features data analytics, APIs, and proprietary functionality, including:

- FDA recall & MAUDE events
- Product equivalents
- Duplicate product detection
- Price variance detection
- Contract identification
- Financial analytics dashboard

Clinical Evidence Research

symplr's Clinical Evidence Research provides evidence-based assessment for new product evaluation, including:

- Overall clinical scorecard
- Level of Evidence (I-V)
- Summary/abstract review
- Identification of company sponsored studies
- Downloadable PDF summary

Product Library

symplr's Product Research Library provides access to product education and advanced information on all medical technology:

- 300K+ SKUs in library
- Product descriptions & brochures
- Reimbursement codes & coding guides
- Side-by-side product comparisons
- Verified supplier data
