Increase the value of your learning investment
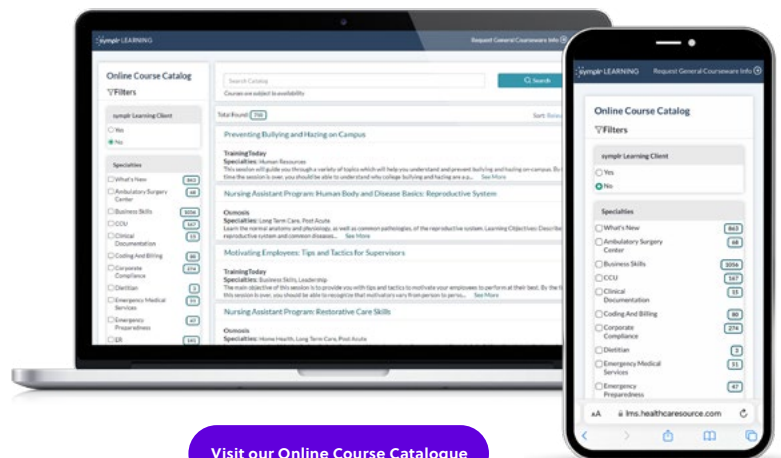

:symplr

With high-quality, engaging learning content that can be easily administered through any learning platform

It takes a lot of time and resources to find, evaluate, purchase, and deploy training courses. If your Learning Management System (LMS) works with SCORM 1.2-compliant courses, then working with the **symplr eLearning Library** will be simple for your LMS administrator. Help your teams stay compliant with industry regulations, spark employee engagement, and improve retention rates, making it easier for you to keep and grow the future leaders of your organization. After all, quality care begins with quality talent.

Our courseware spanning the full continuum of care will help grow and develop a competent workforce.

Courses for Unlocking Potential	Motivate Your Staff to Learn	Enjoy Seamless Course Delivery

• Close skill gaps and grow your workforce with engaging and effective clinical and non-clinical courses that drive results
 	
• Nursing curricula developed by symplr experts
 	
• Partner courses range from regulatory compliance, to patient experience, to team skills, and more
	• Courses incorporate proven methods for effective adult education
	
	• Deliver adaptive content in multiple formats to help drive engagement
	
	• Easily support certification and licensure maintenance, as well as professional development efforts
		• Dedicated client support teams work with you to ensure the successful implementation of symplr licensed-courses in your LMS, including:
		  - Testing and validation
