Proactively build a strategic, sustainable process guided by the data, insights, and digital tools needed to meet aggressive supply chain goals and make evidence-based decisions with a united front.

Access Management

- Guided by industry-leading best practices and expertise, over **50% of U.S. health systems trust symplr to improve their vendor compliance.**
- From vendors to contractors, **know who's onsite and in compliance,** securely manage relationships, and ensure only compliant individuals enter your facilities.
- **Built-in annual background and sex offender checks** and monthly OIG/SAM compliance healthcare exclusion screening support a safe environment for your staff and patients.
- **On-demand dashboards** quickly supply critical data for compliance and audit monitoring.
- **Compliant vendors can check-in in under 30 seconds** via our internet-free kiosk system or from their mobile app.

Spend Management

- Standardize the product introduction process from product request all the way to request for contract with **digital value analysis workflows.**
- **Compare products side by side** to make defensible product decisions.
- Leverage digestible, objective **clinical evidence** research with clinical ratings to support evidence-based decisions.
- Review product data in a **constantly updated centralized library,** including pricing, contract identification, FDA recall and MAUDE events, product equivalents, and more.
- Gain market transparency and support better contracts by accessing **price benchmarking.**
- Leverage **Negotiation Services** to obtain best pricing on capital, consumables, and purchased services.

Contract Lifecycle Management

- **Healthcare-specific workflows and expertise** improve productivity, help eliminate variability, and support governance in the supply chain.
- **ERP integration reduces manual errors and duplicate entries,** enabling business units to conduct business seamlessly with up-to-date information.
- Minimize cyber threats and **protect security** by entrusting your contract management to the only healthcare-specific HITRUST and SOC 2 certified contract solution.
- Supports **one source of truth** for your healthcare contracts with a centralized contract repository
- **Solicit and track vendor performance data** against contracts to protect compliance and evaluate vendor relationships.
