TOP CHALLENGES FACING SUPPLY CHAINS:

1 Supply chain disruptions

2 Cost savings pressure & inflation

TOP PRIORITIES FOR SUPPLY CHAINS

AND WHAT TO DO ABOUT IT:

IMPROVING PATIENT OUTCOMES

Integrate quality and outcomes metrics into value analysis to ensure outcomes are a measurable part of evaluation, sometimes making the decision to convert to clinically superior products despite higher costs.

STANDARDIZING PROCESS

By reexamining, defining, standardizing, and consolidating processes, organizations are able to decrease inefficiency while simultaneously supporting resiliency to hedge against risk.

COST SAVINGS

When traditional cost savings levers have gone dry, organizations are looking to utilization improvements, delivering better data insights through digital transformation, and strengthening both internal and external partnerships in order to drive impact.
